SUMMARY

Results-driven Full-Stack Developer and final-year B.Tech student with hands-on experience building scalable web applications using React.js, Next.js, Node.js, TypeScript, PostgreSQL, and MongoDB. Currently working as a Full Stack Developer Intern, contributing to AI-powered applications, secure authentication systems, cloud deployments, and performance-focused backend development. Solved 400+ DSA problems across platforms and passionate about building clean, scalable, and production-ready software.

EDUCATION

Bachelor of Technology in Artificial Intelligence & Data Science , Maharaja Agrasen Institute of Technology, Delhi CGPA: 8.25	2022 – 2026
CBSE - Grade 12 , Govt. co-ed senior secondary school, New Delhi Marks: 92.8%	2020 – 2021
CBSE – Grade 10 , Govt. co-ed senior secondary school, New Delhi Marks: 90.5%	2018 – 2019

SKILLS

C, C++, Next.js, React.js, JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, Tailwind CSS, Bootstrap, Node.js, Express.js, REST APIs, JWT Authentication, MongoDB, MySQL, Drizzle ORM, Firebase, AWS, Hostinger, Docker, Nginx, CI/CD, LangChain, FastAPI, Git, GitHub, VS Code, Cursor, Postman, Vercel, Data Structures & Algorithms, OOP, DBMS, Computer Networks, OS

EXPERIENCE

Infokit Software Pvt. Ltd.  , Full-Stack Developer Intern	Jan 2026 – Present Delhi
- Architected and shipped full-stack AI web applications using React, Next.js, Node.js, and TypeScript, resulting in a 40% improvement in user engagement metrics. - Engineered a Retrieval-Augmented Generation (RAG) pipeline using FastAPI, LangChain LCEL, and HuggingFace LLMs with pgVector/Chroma vector stores, reducing irrelevant query responses by implementing session-based conversational memory and topic-namespaced collections. - Implemented JWT-based authentication and optimized REST APIs, improving backend response times by 20-30%; containerized services with Docker and deployed on AWS using Nginx as a reverse proxy, integrating CI/CD pipelines to automate testing and production deployments.	

PROJECTS

CodeBox – Gamified Coding Learning Platform 
- Tech Stack: Next.js, TypeScript, Node.js, PostgreSQL, Tailwind CSS, Drizzle ORM, Neon DB. - Developed a full-stack coding platform featuring structured learning paths and an integrated code editor for hands-on practice. - Integrated gamification features including XP rewards, daily streaks, badges, and real-time progress tracking to enhance engagement. - Built scalable backend functionality for course enrollment, chapter navigation, and personalized learning progress management.
DocHive - Online Doctor Appointment Management System 
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, Stripe, Cloudinary - Built a scalable full-stack healthcare platform with role-based access control for patients, doctors, and administrators. - Developed appointment booking, doctor scheduling, and availability management features to streamline the consultation process. - Integrated JWT-based authentication, Stripe payment processing, and Cloudinary image storage for secure and reliable application functionality.
Sorting-Visualiser 
- Tech Stack: React.js, JavaScript, Tailwind CSS - Built an interactive Sorting Visualizer that animates the execution of multiple sorting algorithms in real time. - Added customizable controls for array size, animation speed, and random array generation to improve user engagement. - Designed a clean, responsive interface for an intuitive and educational algorithm visualization experience.

ACHIEVEMENTS & CERTIFICATIONS

- Full-Stack Web Development - 100x Devs Cohort (Harkirat Singh) 
- Solved 300+ LeetCode problems (Arrays, DP, Graphs, Trees); earned 100 Days Consistency, 50 Days Consistency
- Data Structures & Algorithms – CodeHelp (Love Babbar)
